

SPARE TIRE®

Healthcare Never Stops

Ends EHR Downtime — Because Healthcare Can't Afford Downtime

Urgent Challenges Facing Health Care

Average Cost of a Healthcare Data Breach:
\$11M Per Incident

Average Downtime:
24 Days

Average Daily Revenue Loss:
\$1M-\$8M Per Day

- Patient Safety
- Revenue Loss
- Delayed Care
- Reputational Risk

Problem & Solution

SPARE TIRE – EHR Downtime is Not an Issue

First Living, Breathing, Just-In-Time Backup for EHR Downtime & Cyber Resilience

Cloud-Native & Interoperable with Any EHR System

SPARE TIRE®

Ensure Continuity of Care

Guarantee Data Integrity

Build Cyber & Operational Resilience

How it Works

Cloud-Native, EHR-Agnostic External Resilience

Integrated with Epic, Oracle Cerner, MEDITECH, and all EHR platforms

Clinical Workflow Continuity

Keep essential clinical workflows fully operational — write, update, and retrieve records even with limited network connectivity

Mobile Friendly & Cross Platform

Works seamlessly on desktop, laptop, iPad, and mobile devices—allowing clinicians to maintain care delivery anywhere, anytime.

Auto-Sync Functionality

All data captured during downtime syncs back to the primary EHR once systems are restored, eliminating the need for manual data entry.

Minimal Training Required

Built for clinicians with intuitive workflows; easier to use than most existing EHR systems.

Resilience Coverage

- Planned outages
- Cyber incidents
- Ransomware attacks
- System failures

Key Benefits

Saving Patient Lives

Improving Cash Flow

Eliminating Manual & Paper-Based Workarounds

Protecting Revenue

Reducing Reputational Risk

Minimizes reliance on pen-and-paper processes, reducing clinical errors, data loss, staff fatigue, and costly reconciliation efforts post-downtime.

Use Cases

Cybersecurity incidents and ransomware attacks

Planned EHR maintenance and upgrades

Natural disasters impacting infrastructure or connectivity

Power or network outages

Disaster recovery drills and downtime simulations

Who It's For

Hospitals & Health Systems

All ambulatory and specialty care clinics

Emergency Preparedness Teams

Community Hospitals and Clinics

Rural or Resource-Limited Facilities
